MESSAGE FROM THE DEAN

Congratulations on choosing Bentley University’s McCallum Graduate School of Business! We provide a transformative learning experience that offers cutting-edge business skills in a range of specialties and prepares you for success in the next stages of your career. Here, you will develop not only technical proficiency but also the complex reasoning skills needed by leaders at the highest levels.

Since 1917, Bentley University has prepared leaders for a changing world. Since Harry Bentley taught his first classes in accountancy in rented rooms in Boston, our commitments to great teaching and to state-of-the-art business education have not wavered. In 1973, we added graduate programs in order to give more advanced students access to Bentley’s distinctive approach to transformative learning.

Our aim is to do more than help you to get a job. We support your development as a professional, as a leader committed to adding value to organizations, and as a citizen in our broader society. We encourage you to work closely with your professors, take advantage of our learning resources on and off-campus, benefit from our industry-focused centers and programs, which can enhance your ties to practice, and connect with our global alumni community.

Completing a graduate degree can be challenging, especially as you balance the demands of education, work, family, and life. Bentley’s highly talented and committed staff will help you sort through the options to find a schedule that works for you. A graduate academic adviser can help you understand the curriculum, explain programs, answer questions, and find courses that help you meet your goals.

By embarking on a graduate degree, you have made a very conscious decision to invest in yourself and to take a significant step forward along your path of lifelong learning. My hope for each of you is that, during your time as a graduate student, you will engage deeply with your degree program, challenge yourself to grow as a leader, and attain a real sense of mastery in your chosen field.

With my best wishes,

Michael Johnson-Cramer
Dean of Business
